

QUALITY POLICY

Our company develops, manufactures and supplies seats and passive safety systems for cars destined for the Automotive and Racing market.

Regarding the safety and success of our customers, our company has never stopped to satisfy the request.

In this path, Sabelt identifies as key development milestones:

1. To develop, apply, maintain and improve Business Processes consistent with the requirements of ISO 9001 and IATF 16949;
2. To propose innovative and high performance technical and technological solutions to customers. Continuous research in the field of high technology and materials innovation is the best way to guarantee total protection for all passengers.
3. Ensure the development of new projects according to compliance requirements with a structured methodology, with the OEM customer methodologies;
4. Aiming at the highest quality of the product in terms of process, integrating an adequate process of development of the supply chain;
5. To carry out production activities with the utmost respect for the safety of the product and the means, towards customers, users and the environment;
6. Guarantee an excellent level of service, in terms of punctual delivery and flexibility of requests;
7. Maximum attention to reducing costs and eliminating waste;
8. Develop business activities in terms of production capacity, efficiency and profitability.
9. Ensure product compliance, continuity of supply, customer satisfaction and business sustainability through risk management across all business

In this regard, the company decides to:

1. Aim to involve staff, increase motivation and skills at various levels;
2. Use as a guide a Quality Management System in line with the requirements of ISO 9001 and IATF 16949
3. Focus on Continuous Improvement by making available its know-how for the development of standard cars, the result of a long experience in racing.
4. Develop a supplier park that, like Sabelt, has a focus on quality, with ever-increasing levels of performance and reliability

According to this Policy, the Management establishes objectives to be achieved and guarantees the availability of the necessary human, technological and IT resources for their achievement. All staff at various levels must commit to a these goals. The Management also undertakes to diffuse this policy and objectives at various levels, as well as a systematic verification of their achievement.
